

SUBASHREE S

subashreesde@gmail.com — +91-9344485348 — [LinkedIn](#) — [CodeChef](#) — [GitHub](#) — [Portfolio](#)

Career Objective

Software engineering candidate with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming. Experienced in building scalable backend systems, optimizing APIs, and developing production-ready applications with AI integrations using JavaScript and Java.

Education

B.Tech in Information Technology

KGISL Institute of Technology, Coimbatore

2023 – 2027

CGPA: **9.08** / 10

Technical Skills

Languages: Java, JavaScript (ES6+), SQL

Backend: Node.js, Express.js, RESTful APIs, Socket.io, JWT Authentication, Redis, Rate Limiting

Frontend: React.js, HTML5, CSS3, Bootstrap

Databases: MongoDB, MongoDB Aggregation Pipelines, MySQL

DevOps & Tools: Docker, Nginx, Git, GitHub Actions (CI/CD), Linux

Testing & API Tools: Selenium WebDriver, Postman, Unit Testing

Experience

MERN Stack Developer Intern · Isaii, Coimbatore

Jun 2025 – Aug 2025

- Built React.js admin dashboard with automated bulk-action workflows and real-time order status updates, reducing manual processing time by **35%**.
- Implemented field-level PII masking across 6 backend API endpoints, achieving **0% raw data exposure** in client-side responses.
- Slashed REST API response time from **480ms to 180ms** via Redis caching and optimized MongoDB aggregation pipelines.
- Engineered scalable backend services with Redis caching and Dockerized deployments for a production platform used by **100K+ customers**.
- Participated in Agile sprints, daily standups, and peer code reviews; collaborated across backend and DevOps teams to ship features on schedule.

Open Source Contributor · GirlScript Summer of Code

Feb 2025 – Mar 2025

- Ranked **top 1.2% globally** (517/42,000+ contributors) with 17 merged pull requests across JavaScript-based open-source repositories.
- Contributed frontend and backend enhancements including UI improvements, bug fixes, API integrations, and feature updates in collaborative open-source projects.

Projects

CampusLedger – College Document Request & Tracking System

[Live Demo](#) · [GitHub](#) · 2026

- Architected a full-stack document workflow platform with role-based portals (Student, Admin, HOD, Principal) and complete lifecycle management using *Node.js 20, Express 5, React 19, MongoDB, JWT, bcrypt*.
- Secured platform with Helmet, CORS, login rate limiting, tokenized document download links, and audit trail logging via custom middleware.
- Dockerized full stack with multi-stage builds; deployed using Render and GitHub Actions CI/CD.

SmartUzhavan – Bilingual AI Farming Platform

[Live Demo](#) · [GitHub](#) · 2025

- Built Tamil-English farming platform with AI-powered crop disease detection, NDVI sensing, weather forecasts, and government scheme discovery using *Node.js, React.js, MongoDB, Gemini API*.
- Integrated Gemini API for bilingual conversational AI assistant with sub-3s response time.
- Deployed MERN stack using Docker and GitHub Actions CI/CD with secured AI endpoints.

Achievements

- **Top 1.2% Globally** – GirlScript Summer of Code
- **Winner** – Build Your Own AI Chatbot Hackathon (900+ participants)
- **First Runner-Up** – Hackspora 2K25 Hackathon
- **Top Submission** – GenAI Exchange Hackathon by MeitY & Startup India
- **KiTE Achiever Award** – KGISL Institute of Technology

Certifications

- OCI 2025 Certified Generative AI Professional – Oracle
- Microsoft Certified: Azure Fundamentals (AZ-900) – Microsoft

2025
